

West Australia Farmers Holding Back Wheat

ALBERTA POOL IS NOTIFIED OF GRAIN POLICIES

Holdup Is General, Asserts President of Wheat Growers' Union

CALGARY, Dec. 6.—Farmers of West Australia, most westerly state of the British Empire, today were withholding their current crop of wheat from markets of the world.

Cubbing from Perth, W. Australia, President Burt of the Wheat Growers Union of Western Australia, has informed the Alberta Wheat Pool of the wheat holding back and declared it is general throughout the state. The wheat farmers are made to attitude of growers in Australia's other wheat growing sections.

Announcement of the wheat holding back efforts from Australia came quickly on the heels of other Australian statements. Southern dominions were preparing to rapidly move the crop into world markets.

RUMSEY STRIKE

It also followed Alberta efforts sponsored by Rumsey district growers to call a general farm strike in the spring of 1933 and to recall the seedling in Western Canada entirely.

In his cable, President Burt of the Wheat Growers' Union of Western Australia not delivering wheat to the general international market for the holding were not disclosed but it was presumed a few of the general international market were among the causes. No confirmation of the cable was received from the Alberta Wheat Pool headquarters.

IN FULL STRIDE

They disclosed, however, harvesting was just getting into the full stride in Australia and that delivery of the 1932-33 Australian crop had been under way since the first of February. Most production of West Australia last year totalled 1,360,000 bushels with 1,400,000 bushels for the current year. The 1932-33 crop was 1,400,000 bushels. The total Australian production for the current year is approximately 2,100,000 bushels.

Alberta Farmers Started Early

Professing against imprudent wheat prices, the general opinion of the Alberta farmers is that starting the 1932 crop began in August. It ended early in the southern and central sections but the general international market became impaired through forced action in the spring of 1932 and 300,000 bushels in the wheat pool. The general international market over last year allowed delivery of the 1932 crop in the spring of 1932 over on marketing, although export at Vancouver was increased. It extended, would control shipments. Resulting from the wheat holding in the High River, Medicine Hat, Poncha Creek, and other sections. Under John McLaughlin, November 8 called for a general wheat seedling strike. The wheat seedling strike was called for by the United Farmers of the Empire-Grange area. The strike was called for by the United Farmers of the Empire-Grange area. The strike was called for by the United Farmers of the Empire-Grange area.

Delegates Frown On Currency Plan

WHEATPOOL, Dec. 6.—Delegation of Canadian currency to a level not higher than the British pound sterling to effect the wheat advantage which the farmer as a whole suffers, was frowny by delegates to the annual meeting of the Canadian Wheat Pool Association. A resolution recommending linking of the pound with the dollar was rejected.

Many important items were discussed at the three-day session. Chief among them was a plan for the formation of a new committee, was named to advise the general of international conditions and formulate plans for submission to the board.

Many resolutions came before the meeting and a number of them were approved. The resolutions were aimed to involve the price paid farmers for wheat and methods of delivery and the currency plan. A new contract.

Wheat Pool Urges Money Inflation

CALGARY, Dec. 6.—Inflation of Canadian money and linking the Canadian dollar to a level not higher than the British pound sterling was urged by delegates to the annual meeting of the Canadian Wheat Pool Association.

The delegates to the annual meeting of the Canadian Wheat Pool Association, which was held at the Hotel Vancouver, Tuesday, December 6, 1932, were urged to support a resolution recommending linking of the pound with the dollar.

LACK OF SALES FORCES WHEAT PRICES LOWER

WINNIPEG, Dec. 6.—Lack of buying and pressure from some steps, according to reports here, is the reason why wheat prices are lower today than yesterday. The grain exchange here today and reports indicate a slight recovery but no significant change in the market.

December closed at 44 1/2 cents and 45 1/2 cents, while January closed at 44 1/2 cents and 45 1/2 cents. The market was quiet and no significant change in the market.

Support in the May future appeared on the break but the market was not buying was not determined. Some good buying of July wheat at 44 1/2 cents was a factor in the recovery.

Rehearsal advice indicated a good deal of activity, especially at Vancouver, but most of this represented new business and no confirmation of appreciable overseas sales was forthcoming.

Argentine shippers are said to be receiving orders for the month of December. The market was quiet and no significant change in the market.
